

PROVISIONAL OPTIONAL COVER LETTER — DO NOT SUBMIT WITH OPEN GATES

29 August 2026

Editor-in-Chief
The Journal of Financial Market Infrastructures

Dear Editor-in-Chief,

I submit the manuscript “Composable assurance for sovereign digital currency (CBDC): An evidence-gated qualification framework” for provisional consideration as a research paper in The Journal of Financial Market Infrastructures.

The paper develops an evidence-gated qualification framework for sovereign CBDC payment infrastructure. It binds monetary invariants, cross-border settlement evidence, privacy and financial-integrity evaluation, policy limits, and operational-scale claims to explicit maturity ceilings. Its intended contribution is the composable qualification method rather than priority for each underlying component.

The manuscript is relevant to the journal's coverage of payment and settlement systems, settlement risk and interdependencies, non-bank payment service providers, retail payment infrastructure, oversight, and infrastructure-related standardization. The evidence comprises formal modelling, reproducible synthetic and public-list benchmarks, an internal local prototype, and a queueing digital twin. It does not claim certified-HSM, physical multi-region, institutional-field, national-deployment, or independent-replication evidence.

The author confirms that the manuscript has not been published and is not under consideration or in press elsewhere. The study is a non-human computational systems study using public and synthetic materials; no human participant, clinical intervention, or identifiable personal-data result is claimed. Funding is self-funded.

[ACCOUNTABLE AUTHOR MUST INSERT AND APPROVE THE CONFLICT-OF-INTEREST STATEMENT AND A JOURNAL-COMPLIANT, TRUTHFUL AI-USE ACKNOWLEDGEMENT BEFORE THIS LETTER MAY BE SUBMITTED.]

The blinded manuscript excludes author identity. A separate title page provides the confirmed author name, email, ORCID, funding statement, and exclusivity confirmation; affiliation, postal address, and the corresponding-author designation remain open author fields.

Thank you for considering the manuscript.

Sincerely,
Zubaer Mahmood Zubraj
